Internal QMS Audit Report

For the: Town of LaSalle Water Distribution System

Report Prepared By: Karen Burgess, Senior Operations Manager, OCWA

Report Issued: October 10, 2018

The information contained in this Report reflects the Auditor's best judgment in light of the information made available to him/her at the time of preparation.

Nothing in this Report or the related Action Plans should be taken as legal advice. The Auditor makes no representations whatsoever concerning the legal significance of his/her findings, or as to legal matters touched on in this Report, including but not limited to the application of any law to the facts set out herein.

1. GENERAL INFORMATION

Audit Objectives:

- To evaluate the conformance of the QMS (as implemented at the facility) to the requirements of the Drinking Water Quality Management Standard (DWQMS) version 2.0, April 6, 2017,
- To identify and correct nonconformities with the facility's documented QMS, and
- To assess the effectiveness of the QMS and ensure that it is continually improving with each cycle.

Audit Criteria:

- Drinking Water Quality Management Standard, version 2.0 April 6, 2017
- Operational Plan for the Town of LaSalle Water Distribution System (Revision 12, September 20, 2018)
- Town of LaSalle Water Distribution Systems QMS-related documents and records
- Related documents and records referenced in the Operational Plan which were selected by the auditor on a spot check basis
- Previous Internal Audit Report issued October 18, 2017
- Previous External Audit Report issued November 7, 2017

Audit Scope:

Activities related to QMS, as documented in the Operational Plan for the following drinking water system:

- Town of LaSalle Water Distribution System

Leader Auditor: Karen Burgess, Senior Operations Manager, OCWA

Dates On-Site: September 24, 2018

Audit Methods: Interviews, observation of activities and review of documentation and records

2. DETAILS OF FINDINGS

DWQMS Element		
Element 3 – Organizational Structure, Roles, Responsibilities and Authorities		
Type		
☐ N/C	☒ OFI	☐ Comment
Description:		
Page 2 of the Operational Plan was endorsed October 28, 2015 by the Director of Public Works and Manager of Water & Wastewater as the Operating Authority. It was also endorsed on November 10, 2015 by the Mayor and CAO as the Owner. Since then, the CAO Kevin Miller recently stepped down and has been replaced by Joe Milicia. Also with the upcoming municipal election, the current Mayor, Ken Ataya will be replaced. Top Management is responsible for ensuring personnel are aware of all applicable legislative and regulatory requirements. Staff is made aware of applicable legislative and regulatory requirements via the Ministry of the Environment and Climate Change (MOECC) web-site, mandatory training courses and through staff meetings. OFI - The Operational Plan should be re-endorsed after the upcoming municipal election since both Owner Representatives (Ken Ataya & Kevin Miller) will have been replaced.		

DWQMS Element		
Element 6 – Drinking Water System		
Type		
☐ N/C	☒ OFI	☐ Comment
Description:		
A description of the LaSalle Distribution System is located on pages 3 to 5 of the Operational Plan. The Owner and Operating Authority are named in the first paragraph of the Description of the Distribution System and there have been no major changes to the drinking water system since the last revision date. A description of the drinking water system has been provided along with a map of the system (September 2016). This map should be updated to also clearly indicate the location of all the emergency interconnects with the Amherstburg Distribution System and the Tecumseh Distribution System along with any other additions over the last two years. There are also no procedures in place to maintain disinfection residuals however the description indicates several times that ENWIN supplies sufficient secondary disinfection to meet all regulatory requirements within the LaSalle Distribution System. OFI – The water distribution map on page 5 should be updated to clearly indicate the location of all the emergency interconnects with the Amherstburg Distribution System and the Tecumseh Distribution System along with any other additions over the past two years.		

DWQMS Element		
Element 9 – Organizational Structure, Roles, Responsibilities and Authorities		
Type		
☐ N/C	☒ OFI	☐ Comment
Description:		
The Town of LaSalle's explanation of their Organizational Structure including their Top Management is located on page 7 and 8 of the Operational Plan. An Organizational Chart for this water system has also been provided. It is noted that the Organizational Chart identifies both the Owner and QMS Representatives for the LaSalle Distribution System. The chart currently indicates the Water Superintendent title however the title is actually called Superintendent of Water & Wastewater.		
OFI - Update the Water Superintendent title to accurately reflect the correct name of the title which is Superintendent of Water & Wastewater.		

DWQMS Element		
Element 13 – Essential Supplies and Services		
Type		
☐ N/C	☒ OFI	☐ Comment
Description:		
The procedure for Essential Supplies and Services can be found in Appendix E of the Operational Plan.		
An Emergency/Essential Supplies & Services List with revision #21 and dated 20-Sep-2018 was reviewed. The list includes names and telephone numbers for each of the suppliers and services that could be required. The procedure also identifies that this list is reviewed at least annually and updated as required. Prior to the September 29, 2017 update, this list was previously updated on January 23, 2017 and November 14, 2016.		
OFI - Under the 'LaSalle Contacts', the Superintendent of Water and Wastewater (Rob Mackie) should be included and the CAO, Kevin Miller needs to be updated with Joe Milicia's contact information.		

DWQMS Element		
Element 15 – Infrastructure Maintenance, Rehabilitation and Renewal		
Type		
☐ N/C	☒ OFI	☐ Comment
Description:		
A description on addressing the subject of Infrastructure Maintenance, Rehabilitation and Renewal is located on page 10 and 11 of the Operational Plan. Maintenance, rehabilitation and renewal programs are summarized and communicated to council through the annual management review meeting minutes and the water & wastewater committee meeting reports. Also, a new electronic work order system is currently being deployed. This program is called 'City Wide' and will have an effect on the maintenance, rehabilitations and renewal programs towards the infrastructure. OFI - It also indicates that long term capital planning is also reviewed at least once every calendar year however additional information is required. A description as to what activities are considered within this forecast and the number of years that will be forecast must be included.		

DWQMS Element		
Element 20 – Infrastructure Maintenance, Rehabilitation and Renewal		
Type		
☐ N/C	☒ OFI	☐ Comment
Description:		
The Management Review procedure can be found in Appendix K of the Operational Plan. The Management Review must be conducted at least once every calendar year. The previous Management Review was conducted on March 20, 2017 and the most recent Management Review was conducted on September 17, 2018. OFI - Another Management Review meeting should be scheduled immediately so that the outcomes of this current internal audit can be reviewed and discussed so that any OFI's or N/C's can immediately be addressed instead of waiting for next year.		

DWQMS Element Element 22 – Directors Direction		
Type ☐ N/C ☒ OFI ☐ Comment		
Description: The title page included the name of the municipal residential drinking water system however pages 7 to 13 were missing the revision date and page number. A copy of Schedule "C" of the Director's Direction is located in Element 6 – Drinking Water Description of the Operational Plan. OFI - Ensure the revision date and page numbers (page 7 to 13) are captured on all the pages of the Operational Plan and that the Table of Contents page numbers match the page the element is actually found on.		

AUDIT CONCLUSIONS

The auditor conducted an audit of the QMS of the LaSalle Water Distribution System focusing on key quality management processes necessary to consistently produce and distribute drinking water that meets applicable requirements.

Taking into consideration all the findings of this audit and the above noted OFI's, the auditor has concluded that sufficient evidence has been provided to demonstrate that the LaSalle's Water Distribution System has established and is actively implementing a QMS that meets the intent of the DWQMS.

 Karen Burgess, Senior Operations Manager

Responsibilities Under the Statutory Standard of Care - Safe Drinking Water Act

0.3

CEU Value

Course Overview

The Standard of Care course is designed to inform municipal councillors and officials of their oversight responsibilities under Section 19 of the Safe Drinking Water Act, which came into effect on December 31, 2012. Severe penalties are possible for municipal officials who fail to act in good faith and do not exercise honesty, competence and integrity to ensure the protection and safety of the users of municipal drinking water systems.

Several examples of waterborne disease outbreaks are examined which highlight the importance of competent oversight. The course describes some general information about drinking water systems, the multi-barrier approach to drinking water treatment and some of the risks associated with drinking water production and distribution.

The participant will also learn about additional specialized training that is available.

Target Audience

This course is designed for mayors, councillors and municipal officials with oversight responsibility for drinking water treatment and/or distribution systems.
